Cure indoor dryness and get the very best whole-home comfort.
Increasing the humidity of your home helps eliminate the dry air that can irritate and inflame the respiratory passages in the nose and throat and can relieve the discomforts of colds and the flu.

– A.D.A.M. Health Encyclopedia

There is as yet no cure for the common cold. The most important preventative measure would appear to be the proper regulation of the humidity.

Trust your comfort—and your home—to Aprilaire.

Aprilaire humidifiers provide humidity in the form of pure water vapor to prevent minerals from entering the air stream. Water is supplied to the distribution tray and flows evenly across the Water Panel®. Heat from the heating system causes the water to evaporate. Properly humidified air (vapor) is then distributed throughout your entire home.
